Summary

Entry-level Data Engineering enthusiast with strong foundations in SQL, Python, and data processing. Hands-on experience in building data workflows, performing ETL operations, and working with structured and unstructured datasets. Familiar with data warehousing concepts, APIs, and data pipelines. Passionate about building reliable and scalable data systems and eager to work with modern data platforms.

Education

Seshadri Rao Gudlavalleru Engineering College

2022 – 2026

B.Tech in Computer Science Engineering (AI & Data Science), Andhra Pradesh, India

Technical Skills

- **Programming:** Python, Java
- **Databases:** SQL
- **Data Engineering:** ETL, Data Pipelines, Data Cleaning, Data Transformation
- **Libraries:** pandas, NumPy, scikit-learn, Matplotlib
- **Visualization:** Tableau, Power BI (Basic), Matplotlib

Experience

CipherByte Technologies

2025

Python Intern (Remote)

- Developed and maintained Python-based data processing workflows for structured datasets
- Performed ETL operations including data extraction, transformation, and loading from multiple sources
- Optimized data processing tasks, improving efficiency by 25%
- Cleaned and validated datasets (10k+ records), ensuring data quality and consistency
- Generated structured datasets for downstream analysis and reporting

SmartBridge

2024

Data Analytics Intern (Remote)

- Processed and transformed datasets using Python and Excel for analysis
- Built Tableau dashboards using cleaned and structured data
- Designed workflows for preparing datasets for visualization
- Worked with structured data formats such as CSV and Excel

Projects

Unemployment Rate Prediction

GitHub Repository

- Collected and processed datasets using Python for analysis and modeling
- Performed data cleaning, transformation, and feature engineering
- Built data pipelines for preparing datasets for machine learning models
- Visualized processed data using Matplotlib and pandas

Job Recommendation System

GitHub Repository

- Built a data processing pipeline for extracting and transforming job-related data
- Processed textual datasets using TF-IDF for feature extraction
- Designed a recommendation system using similarity-based ranking
- Worked with structured and unstructured data formats

Certifications

- Fundamentals of Artificial Intelligence – IBM SkillBuild
- Python Programming – Infosys Springboard
- Fundamentals of Java – Great Learning
