EDUCATION

- **Seshadri Rao Gudlavalleru Engineering College**, Gudlavalleru
B.Tech in Artificial Intelligence & Data Science Oct 2022 – May 2026

SKILLS

- **Programming:** Python, Java
- **Core Computer Science:** Basics Data Structures and Algorithms, Object-Oriented Programming (OOP)
- **AI/ML Frameworks:** Numpy, Pandas, Scikit-Learn, TensorFlow, PyTorch

EXPERIENCE

- **Infosys Springboard** Feb 2026 – Apr 2026
Java Intern
 - Developed a Bank Grievance & Feedback Management System using Java and Spring Boot, improving complaint tracking efficiency by 30%.
 - Designed and implemented RESTful APIs for complaint submission and status tracking, reducing response time by 25%.
 - Built responsive frontend interfaces and integrated backend services, enhancing user experience and system usability.
- **Vinti Web Solutions** Feb 2026 - May 2026
Junior Frontend Intern
 - Developed a responsive ERP dashboard using modern frontend technologies, enabling management of inventory, customers, and financial data.
 - Built reusable and dynamic UI components aligned with real-time data updates and user interactions.
 - Collaborated with backend teams to integrate REST APIs for seamless data flow and live data visualization.
 - Improved user experience through responsive design, optimized layouts, and intuitive data presentation.
 - Debugged and resolved UI issues in a production-like environment, ensuring performance and reliability.

PROJECTS

- **RAG Chatbot using LangChain** GitHub Repository
 - Built a Retrieval-Augmented Generation (RAG) chatbot to answer queries based on structured CV data.
 - Generated embeddings and stored them using FAISS vector database for efficient retrieval.
 - Implemented similarity search and LLM-based response generation using Python and LangChain.
- **Playto Payout Engine** GitHub Repository
 - Developed a payout processing system using Python and Django.
 - Built RESTful APIs for transaction processing, payout calculations, and data validation.
 - Implemented asynchronous background jobs using Celery for efficient payout execution.
 - Integrated PostgreSQL database for secure and scalable data management.
- **Unemployment Rate Prediction** GitHub Repository
 - Processed and analyzed datasets using Python and SQL.
 - Applied data preprocessing, cleaning, and transformation techniques.
 - Built and trained a machine learning model to predict unemployment trends.

CERTIFICATIONS

- Fundamentals of Artificial Intelligence — IBM SkillBuild
- Python Programming — Infosys Springboard
- Fundamentals of Java — Great Learning
- Infosys Pragathi Cohort 3 — Women's Empowerment Program
