Education

Seshadri Rao Gudlavalleru Engineering College, Gudlavalleru

Oct 2022 – May 2026

B.Tech in Artificial Intelligence & Data Science

Skills

- **Programming:** Python, Java
- **Core Concepts:** Object-Oriented Programming
- **AI/ML:** Machine Learning, Deep Learning, Generative AI, Prompt Engineering
- **Frameworks & Libraries:** TensorFlow, PyTorch, Scikit-learn, Pandas, NumPy, LangChain
- **Web & Backend:** React.js, Spring Boot, Django, REST APIs
- **Databases:** SQL, PostgreSQL
- **Tools:** Git, GitHub, VS Code, Jupyter Notebook

Experience

GenAI Intern – SmartBridge

Jul 2024 – Sep 2024

- Worked with Generative AI, Large Language Models (LLMs), and AI workflows for intelligent applications.
- Developed chatbot-style solutions using prompt engineering and text generation techniques.
- Improved AI response quality through iterative prompt design and evaluation.
- Explored Python-based workflows for integrating LLMs into applications.

Java Intern – Infosys Springboard

Feb 2026 – Apr 2026

- Developed a full-stack Bank Grievance & Feedback Management System using Java and Spring Boot.
- Designed and implemented RESTful APIs for complaint submission and status tracking.
- Built responsive frontend interfaces and integrated backend services for seamless data flow.
- Applied backend logic and API design principles to support real-time user workflows.

Junior Frontend Intern – Vinti Web Solutions

Feb 2026 – May 2026

- Developed a responsive ERP dashboard to manage inventory, customers, and financial data.
- Built reusable UI components with real-time data updates and interactive visualizations.
- Integrated frontend modules with REST APIs for seamless backend communication.
- Improved user experience through optimized layouts and responsive design.

Projects

RAG Chatbot using LangChain

GitHub Repository

- Built a Retrieval-Augmented Generation (RAG) chatbot using LangChain and Large Language Models.
- Generated embeddings and stored them using FAISS for efficient vector retrieval.
- Implemented similarity search and context-aware response generation.

AI Market Analysis Dashboard

GitHub Repository

- Built an interactive dashboard using Python, Pandas, and Jupyter Notebook to analyze market trends.
- Performed data cleaning, preprocessing, and visualization on real-world datasets.
- Generated insights using exploratory data analysis to support data-driven decision making.

Playto Payout Engine

GitHub Repository

- Developed a payout processing system using Python, Django, and REST APIs.
- Built backend services for transaction validation and payout processing.
- Implemented asynchronous task execution using Celery.
- Integrated PostgreSQL for scalable and reliable data management.
