EDUCATION

- Seshadri Rao Gudlavalleru Engineering College, Gudlavalleru**
B.Tech in Artificial Intelligence & Data Science Oct 2022 – May 2026

SKILLS

- Programming:** Python, Java
- Core Concepts:** Object-Oriented Programming
- AI/ML:** Machine Learning, Deep Learning, Generative AI, Prompt Engineering
- Frameworks & Tools:** TensorFlow, PyTorch, Scikit-learn, Pandas, NumPy, LangChain
- Web & Backend:** React, Spring Boot, Django, REST APIs
- Databases:** SQL, PostgreSQL

EXPERIENCE

- GenAI Intern — SmartBridge** July 2024 – Sep 2024
 - Worked with Generative AI, LLMs, and AI-based workflows similar to agent systems.
 - Developed chatbot-style solutions using prompt engineering and text generation techniques.
 - Improved AI response quality through iterative prompt design and evaluation.
 - Explored integration of LLMs into applications using Python-based workflows.
- Infosys Springboard** Feb 2026 – Apr 2026
Java Intern
 - Developed a full-stack Bank Grievance & Feedback Management System using Java and Spring Boot, improving efficiency by 30%.
 - Designed and implemented RESTful APIs for complaint submission and tracking, reducing response time.
 - Built and integrated responsive frontend interfaces with backend services for seamless data flow.
 - Applied backend logic and API design principles to handle real-time user workflows.
- Vinti Web Solutions** Feb 2026 – May 2026
Junior Frontend Intern
 - Developed a responsive ERP dashboard to manage inventory, customers, and financial data.
 - Built dynamic UI components with real-time data updates and interactive visualizations.
 - Integrated frontend with REST APIs for seamless backend communication.
 - Improved user experience through optimized layouts and responsive design.

PROJECTS

- RAG Chatbot using LangChain** GitHub
 - Built a Retrieval-Augmented Generation (RAG) chatbot using LangChain and LLMs.
 - Generated embeddings and stored them using FAISS for efficient retrieval.
 - Implemented similarity search and context-aware response generation.
- Playto Payout Engine** GitHub
 - Developed a payout system using Python and Django.
 - Built REST APIs for transaction processing and data validation.
 - Implemented asynchronous processing using Celery.
 - Integrated PostgreSQL for scalable data management.
- Unemployment Rate Prediction** GitHub
 - Processed datasets using Python and SQL.
 - Applied data cleaning, preprocessing, and transformation techniques.
 - Built a machine learning model to predict unemployment trends.

CERTIFICATIONS

- Fundamentals of Artificial Intelligence — IBM SkillBuild
- Python Programming — Infosys Springboard
- Fundamentals of Java — Great Learning
- Infosys Pragathi Cohort 3 — Women’s Empowerment Program
