EDUCATION

Seshadri Rao Gudlavalleru Engineering College

B.Tech in Artificial Intelligence & Data Science

Oct 2022 – May 2026

SKILLS

- **Programming:** Python, Java
- **Core CS:** Artificial Intelligence, Machine Learning, Data Science
- **AI/ML:** NumPy, Pandas, Scikit-learn, TensorFlow, PyTorch
- **AI Tools:** Chatgpt, Claude, Cursor

EXPERIENCE

Infosys Springboard

Feb 2026 – Apr 2026

Java Intern

- Developed a Bank Grievance & Feedback Management System using Java and Spring Boot, improving complaint tracking efficiency by 30%.
- Designed and implemented RESTful APIs for complaint submission and status tracking, reducing response time by 25%.
- Built responsive frontend interfaces and integrated backend services, enhancing system usability and user experience.

Vinti Web Solutions

Feb 2026 – May 2026

Junior Frontend Intern

- Developed a responsive ERP dashboard enabling management of inventory, customers, and financial data.
- Built reusable and dynamic UI components aligned with real-time data updates and user interactions.
- Collaborated with backend teams to integrate REST APIs for seamless data flow and live data visualization.
- Improved user experience through responsive design, optimized layouts, and intuitive data presentation.
- Debugged and resolved UI issues in a production-like environment, ensuring performance and reliability.

PROJECTS

RAG Chatbot using LangChain

GitHub Repository

- Built Retrieval-Augmented Generation (RAG) chatbot using LangChain, FAISS, and LLMs for intelligent query.
- Generated embeddings and implemented vector-based similarity search for accurate and low-latency retrieval
- Designed end-to-end pipeline: document chunking → embedding → retrieval → LLM response generation
- Optimized retrieval quality and response relevance through FAISS tuning and prompt engineering

Playto Payout Engine

GitHub Repository

- Developed scalable payout processing system using Python, Django, and REST APIs
- Designed backend architecture for transaction processing, validation, and payout computation
- Implemented asynchronous task execution using Celery for efficient and reliable processing
- Integrated PostgreSQL for secure and high-performance data management

Unemployment Rate Prediction

GitHub Repository

- Built machine learning model using Python and SQL to predict unemployment trends
- Performed data preprocessing, feature engineering, and model training
- Visualized insights to support data-driven decision-making

CERTIFICATIONS

- **Fundamentals of Artificial Intelligence** — IBM SkillBuild
- **Python Programming** — Infosys Springboard
- **Fundamentals of Java** — Great Learning
- **Infosys Pragathi Cohort 3** — Women's Empowerment Program
