Summary

Entry-level Data Analytics professional with experience in Python, data wrangling, and dashboard development. Skilled in transforming datasets into actionable insights using Tableau and Excel. Familiar with ETL processes, statistical analysis, and visualization techniques to support data-driven decision making.

Education

- **Seshadri Rao Gudlavalleru Engineering College** 2022 – 2026
B.Tech in Computer Science Engineering (AI & Data Science), Andhra Pradesh, India

Technical Skills

- **Programming:** Python, Java
- **Python Libraries:** NumPy, pandas, scikit-learn, Matplotlib, Seaborn
- **Data Science:** Data Cleaning, Data Wrangling, Exploratory Data Analysis (EDA), Statistical Analysis
- **Machine Learning:** Regression, Classification, Model Evaluation, Predictive Modeling
- **Data Visualization:** Tableau, Power BI, Matplotlib, Seaborn
- **Tools & Technologies:** Jupyter Notebook, Git, Excel
- **Databases:** SQL
- **Concepts:** ETL Pipelines, Data Transformation, Reproducible Analysis, Data-Driven Decision Making

Experience

- **CipherByte Technologies** March 2025 - May 2025
Python Intern (Remote)
 - Automated Python data processing workflows reducing manual data handling time by 35%.
 - Cleaned and transformed datasets containing 10k+ records for analytics and reporting tasks.
 - Optimized scripts for data extraction and transformation improving performance by 25%.
 - Generated analytical reports and visual insights supporting data-driven decisions.
- **SmartBridge** June 2025 - Aug 2025
Data Analytics With Tableau Intern (Remote)
 - Built an interactive Tableau dashboard analyzing heritage treasures datasets and tourism insights.
 - Processed and prepared datasets using Excel and Python improving data quality for visualization.
 - Designed charts, filters, and KPI metrics enabling exploration of regional tourism trends.
 - Presented insights through dashboard storytelling and visual analytics techniques.

Projects

- **Unemployment Rate Prediction — Python, NumPy, Pandas, Machine Learning, Scikit-learn**
 - Built machine learning models to analyze and predict unemployment trends.
 - Performed data cleaning and exploratory data analysis using pandas and NumPy.
 - Applied regression techniques and evaluated model performance.
 - Visualized insights using Matplotlib.
- **Job Recommendation System — Python, Machine Learning, NLP, TF-IDF, Cosine Similarity**
 - Developed an NLP-based recommendation system using TF-IDF and cosine similarity.
 - Processed and cleaned job data for better matching results.
 - Implemented skill-based ranking for personalized job recommendations.

Certifications

- Fundamentals of Artificial Intelligence – IBM SkillBuild
- Python Programming – Infosys Springboard
- Fundamentals of Java – Great Learning
